PRELIMINARY PROGRAM OF EVENTS AGRA 2026

PROFESSIONAL PROGRAM BY DAY

THE AGRA FAIR IS ALIVE!

Experience Tradition, Discover the Future!

ALGERIA – Partner Country of the International Fair AGRA 2026!

This year's International Agricultural and Food Fair AGRA proudly opens its doors to its new partner country – Algeria. This largest African country and gateway to the Mediterranean at the crossroads of Europe, Africa, and the Arab world brings a rich tradition, exceptional agricultural achievements, and immense opportunities for economic cooperation to the fair.

A Desert that Yields Top-Quality Crops Although most of the country is covered by the mighty Sahara, Algeria has an exceptionally developed agricultural sector in its fertile northern region along the Mediterranean Sea. It is known as one of the world's largest producers of unique date varieties (especially the world-famous premium variety Deglet Nour) and also boasts top-tier production of olive oil, citrus fruits, figs, and early vegetables. In recent years, Algeria has been investing heavily in modernizing agricultural technology, irrigation systems, and sustainable food production in arid regions, which is becoming a key challenge for global agriculture.

A Bridge Between Slovenia and Africa The partnership at AGRA 2026 opens new doors for Slovenian agricultural machinery, seed production expertise, and innovative technologies, which Algeria is rapidly importing. On the other hand, fair visitors will be able to immerse themselves in the rich flavors of North African cuisine, discover their indigenous agricultural products, and feel the pulse of a land where tradition intertwines with a vision for the future.

Don't Miss at AGRA 2026: Visit Algeria's national exhibition area, where you can meet their growers, taste authentic Algerian delicacies, and explore business opportunities with this fast-growing market!

ANIMAL PARADISE

Meet the Stars of the Fair!

The AGRA fair will be truly alive with diverse professional animal exhibitions!

- An unforgettable encounter with the pride of Slovenia awaits you: Styrian hens and our Carniolan honey bees. (Don't miss the information on the Krškopolje pig!)
- **Mighty Cattle:** Champions of their breeds – Charolais, Simmental, Brown, various meat breeds, Limousin, and Black-and-White. Admire breeding bulls, heifers, suckler cows with their calves, and the charming Cika!
- **Elegant Horses:** From our Posavina, Haflinger, Lipizzan, and Slovenian Coldblood beauties to the Bosnian Mountain Horse and the fast Ljutomer Trotter. As special guests, Lipica Stud Farm presents itself, and horse jumping obstacles will also thrill you.
- **Lively Small Livestock:** Explore the diversity of Slovenian autochthonous, traditional, and foreign breeds of sheep and goats. Lambs from commercial crossbreeding will be particularly interesting.
- **Charming Pigs:** Learn about the SloHibrid breeding program and discover all about the Krškopolje pig through presentations and interesting projections.
- **For the Youngest (and all young at heart):** Visit the **Small Animal Petting Zoo**, a real feast for the eyes and soul!

GREEN OASIS OF KNOWLEDGE

The Permaculture Center of Pomurski Sejem Invites You!

Immerse yourself in the world of nature, innovation, and sustainability!

- **Garden of the Rakičan Biotechnical School:** A model plantation of field crops, vegetables, and herbs with autochthonous varieties – from corn to plants for bee pasture.
- **Garden of the Faculty of Agriculture and Life Sciences, Maribor:** Discover plants for gluten-free foods and alternative crops of the future!
- **Organic Polygon:** See the 5-year vegetable and field crop rotation plan of the Association of Ecological Farmers of Slovenia.
- **Permaculture-Biodynamic Garden with an Eco-House:** Experience harmony with nature, learn about resource conservation (water, soil, air), and admire a house made of straw bales! In collaboration with the Permaculture Association of Slovenia and the Amarant seed house.
- **Model Apiary & Honey Plants:** Learn about the importance of beekeeping and the indispensable role of bees.
- **Forest-Park Plantation:** The Slovenia Forest Service presents tree species for today and tomorrow, forest etiquette, and forest pedagogy for all generations.
- **Climate Goals Hayrack (Kozolec):** A traditional *toplar* hayrack as a symbol of sustainable construction and smart farming – a clear demonstration of how to tackle climate challenges.

WHERE THE PAST MEETS THE FUTURE:

Museum of Old Farm Tools and Tasks

At the AGRA fair, where the future of agriculture is presented with state-of-the-art technology, we are once again opening a special window into the past. We proudly present an exceptional exhibition – the **Museum of Old Agricultural Tools and Tasks**, which takes you on a journey into the heart and soul of the Pomurje land as it used to be.

Step back in time with us to an era when the rhythm of life was synchronized with nature, when every tool in hand carried a story of effort, ingenuity, and respect for the land. Before the exhibition halls were filled with the sounds of powerful machines, different sounds echoed across the vast plains and soft hills of Pomurje: the scythe cutting through tall grass, the rhythmic thud of flails against golden grain, and the song of girls during flax harvesting.

In our museum, you will not only see objects, but relive life itself:

- **From Grain to Bread: A Story of Perseverance** – Discover the journey of grain from sowing to a warm loaf of bread on the table. View wooden plows and harrows pulled through sweat by livestock, and admire the dexterity of hands that knew how to sow at just the right density. We will revive the memory of harvesting, when men and women bent under the hot sun with sickles and scythes, followed by children picking up scattered ears. A special experience will be the threshing presentation, where you will feel the power of flails and see the operation of the first horse-powered threshing machines, combining animal and human power to bring relief to one of the hardest farm tasks.
- **The Wealth of Pomurje: From Pumpkin Seed Oil to White Linen** – The museum pays special attention to tasks that marked this region. Discover how "black gold" – precious pumpkin seed oil, which was and remains the pride of Pomurje – was extracted from pumpkin seeds using simple presses (*špure*). Walk through the entire process of flax processing, from harvesting to spinning on a spinning wheel. You will see break-boards for crushing stems, combs for carding fibers, and looms used to weave durable linen for clothes and dowries.
- **Farm Life: Care for Home and Livestock** – The collection includes countless other objects testifying to everyday life. There are wooden rakes, pitchforks, and wagons used to gather hay into characteristic Pannonian hayracks. Admire butter churns, manual corn shellers, woven baskets (*jerbasi*) for carrying crops, and winemaking tools that speak to the rich tradition of grape growing on the slopes of Prlekija and Goričko.

The Museum of Old Agricultural Tools at the AGRA fair is more than just an exhibition; it is a tribute to our ancestors. It is a reminder of a time when connection to the earth was the foundation of survival and when the community breathed as one. We invite you to pause for a moment, listen to the silence of wood and metal, and immerse yourself in the stories told by objects soaked in the sweat and pride of the Pomurje farmer.

Experience the heritage that shaped the present. Welcome to visit!

WORLD TRAVELLER IN THE HONEY TEMPLE

The Bee World Pavilion at AGRA

The "World of Bees" Pavilion at AGRA In the heart of the fairgrounds, in the Honey House, the "World of Bees" pavilion has found its home after its world tour. This exceptional acquisition is not just an exhibition; it is a living experience that traveled the world as an ambassador of Slovenian nature and knowledge, and is now presented at home, at the crossroads of beekeeping excellence.

Step into an architectural masterpiece replicating a honeycomb and immerse yourself in a world where our national heroine – the native Carniolan honey bee (*Apis mellifera carnica*) – plays the main role. Learn why this hardworking and peaceful creature is considered one of the most valued bees in the world.

An Experience for All Senses in the Honey House The World of Bees Pavilion is a symphony of buzzing, the scent of honey, wax, and propolis.

- **Discover Life in the Hive:** Observe the perfect organization of a bee colony through glass walls. Watch worker bees in their tireless labor, spot the queen, and listen to the pulse of thousands of wings creating life.
- **The Art of Painted Hive Fronts:** Admire a rich collection of painted hive fronts, a unique folk art form that decorated Slovenian apiaries. Each painting tells its own story – of everyday life, fears, humor, and ancestors' beliefs.
- **A Festival of Quality and Flavors:** Right here in the Honey House, next to the pavilion, you can also view the prestigious exhibition of winners from the international honey evaluation from all over the world. Discover which honeys earned gold awards and experience the supreme quality achieved by beekeepers.

More Than Just a Bee: A Message for the Future The pavilion carries a deeper message with which Slovenia impressed the world and, on its initiative, achieved the declaration of World Bee Day. This is

a story about the indispensable role of pollinators for our food security and biodiversity conservation. Without bees there is no pollination, without pollination there are no crops, no food.

You will also learn about innovative aspects of Slovenian beekeeping, such as apitourism, offering unique experiences near bees, and the beneficial effects of apitherapy, where hive aerosols positively affect the respiratory system.

The World of Bees Pavilion in the Honey House is the pride of Slovenia. It is proof of how tradition and modern knowledge can be the best exporters of sustainability stories. We invite you to experience this inspiring world, learn about the crucial importance of bees, and admire internationally recognized honey excellence.

Listen to the buzz of the future and taste golden quality. Welcome to the Honey House!
